

Pain Management

TOTAL
VETERAN
HEALTHCARE

Holistic and Targeted Pain Management

In coordination with in-house Pain Specialists and under the guidance of our dedicated Chief Medical Officer of Pain Management, Total Veteran Healthcare delivers skilled multidisciplinary healthcare teams from our extensive network, to develop personalised treatment plans, all coordinated by a service-aware GP.

Your bespoke care plan will address the physical, emotional and psychological aspects of your pain condition. **While this may include clinically appropriate medications, we take a holistic approach that champions emergent therapies** clinically proven to reduce reliance on poly-pharmacy (treatments that use multiple pharmaceutical treatment protocols).

Pain Management

Chronic pain can be a debilitating reality for many Veterans, and effective pain management strategies are a vital pillar within Veteran health.

We specialise in delivering both non-invasive and invasive pain relief, including Specialist consultation to determine the most clinically appropriate pain management treatment pathway for every patient.

Support for Chronic Pain

Our goal is to help Veterans regain control of their lives and empower them with renewed strength and confidence.

Total Veteran Healthcare is dedicated to providing ease and speed of access to high quality healthcare, no matter where you are located. We provide services in person and via telehealth (where clinically appropriate), and have partnered with leading pharmacies across Australia to ensure you convenient access to specialised prescriptions.

Your pain management treatment plan can include:

- » Non-invasive innovative medicine
- » Psychology
- » Exercise Physiology
- » Chiropractic
- » Osteopathic
- » Physiotherapy
- » Dietetics

Enquire today to learn more about how Total Veteran Healthcare can support you to move forward without pain.
